Maybe this thread will help you: <http://stackoverflow.com/questions/3930990/android-how-to-enable-disable-wifi-or-internet-connection-programmatically>

Just remember that messing with other people's wi-fi can get you in legal troubles. There used to be an app on Google Play that enabled you to turn wi-fi on/off for other devices on the same network but it was pulled by Google because it was considered evil.
