Class Overview

Interface definition for a callback to be invoked when a touch event is
dispatched to this view. The callback will be invoked before the touch
event is given to the view.

Summary

Public Methods

abstract boolean	onTouch (View v, MotionEvent event) Called when a touch event is dispatched to a view.

Public Methods

public abstract boolean **onTouch** (View v,
MotionEvent event)   Added in API level 1

Called when a touch event is dispatched to a view. This allows
listeners to get a chance to respond before the target view.

Parameters

v	The view the touch event has been dispatched to.
event	The MotionEvent object containing full information about the event.

Returns

True if the listener has consumed the event, false otherwise.
